

RecoLay

acoustic underlay

Flooring for the Specialist

quiet matters

Noisy buildings are bad for people and business.

They damage health, reduce productivity, slow learning and inhibit sales.

CFS acoustic underlays shrink these negative effects, making buildings work better for all the people who live, learn or do business in them.

In most cases CFS acoustic underlays can remove the need to make more structural changes to the existing floors and ceilings, so reducing costs and upheaval significantly.

The environmental cost is also reduced. All our products have a very high recycled content. Our raw materials come from:

Recycled cork from the stopper industry. Cork oak forests retain 14 million tonnes of CO₂ each year. Harvesting the bark for stoppers increases each tree's ability to do this.

Recycled rubber from the tyre industry. We convert over 200 tonnes of tyre waste every month giving this highly resilient material a second life in our specialist underlays.

Recycled PVC from the flooring industry. In the manufacture of our RecoLay 10mm and 12mm we use waste from the major floorcovering manufacturers as well as PVC waste from old floors that have been uplifted.

Recycled EVA from the sports shoe industry. The waste from sports shoe manufacture is very flexible, durable and resilient - an ideal material for some of our acoustic underlays.

All our underlays are also recyclable, of course.

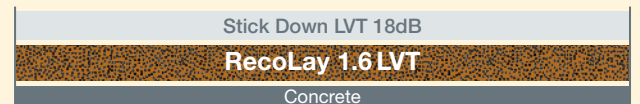

RecoLay 1.6 LVT

Low weight and low gauge acoustic underlay for use under **luxury vinyl tiles**.

- 100% Recycled cork and EVA
- Impact Sound Reduction of 18dB**
- Ideal for under-floor heating

**Stick Down

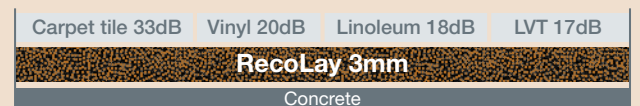

RecoLay 3mm

Acoustic underlay for use under **carpet tiles, sheet vinyl, click LVT and linoleum**.

- 100% Recycled cork and rubber
- Impact Sound Reduction between 17dB to 33dB
- Ideal for under-floor heating
- Capability to cover slight subfloor imperfections

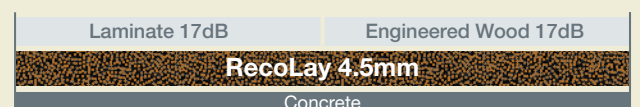

RecoLay 4.5mm

Acoustic underlay for use under **laminated and engineered wood floors**.

- 100% Recycled cork and rubber
- Impact Sound Reduction of 17dB
- Ideal for under-floor heating
- Capability to cover slight subfloor imperfections

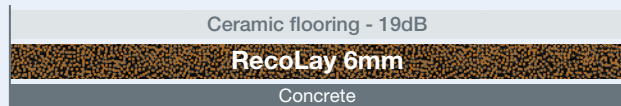

Download the datasheets and the approved adhesive guide & installation notes via our website.

RecoLay 6mm

Acoustic underlay designed for use under **ceramics**.

- 100% Recycled cork and rubber
- Impact Sound Reduction of 19dB
- Capability to cover slight subfloor imperfections

Cost effective to install

10 year in-use warranty

Available nationwide

Available at all CFS Stockists

**UK Building Regulations,
Document E Compliant**

RecoLay 10mm Underlay Tile

2-ply laminate acoustic underlay mat designed to significantly reduce the potential for noise nuisance primarily in **refurbishment** and **conversion projects**.

- Recycled PVC and PE foam
- Impact Sound Reduction of 31dB
- Suitable for most finished floors
- Can be loose laid
- 100% recyclable

RecoLay 12mm Underlay Tile

Triple layer acoustic underlay mat designed to significantly reduce the potential for impact and airborne noise nuisance primarily in **refurbishment** and **conversion projects**.

- Recycled PVC and PE foam
- Impact Sound Reduction of 31dB
- Suitable for most finished floors
- Improves airborne sound insulation
- Can be loose laid
- 100% recyclable
